- NodeJs - Complete guide (Udemy)

EDUCATION

Bachelor of Science in Computer Science

University of Prishtina "Hasan Prishtina" - Faculty of Mathematics and Natural Sciences, Department of Mathematics

PROFILE

Web Developer with 6 years of experience building and maintaining enterprise web applications. Strong frontend focus with React-based frameworks (CxJS, React, Next.js) and solid backend experience using Node.js and AWS Serverless. Experienced in Agile/Scrum environments, clean code practices, accessibility, and cross-team collaboration. Comfortable working on complex systems and taking ownership of features end-to-end.

WORK EXPERIENCE

Poster Gifts (Project-Based Development)   OCT 2025– JAN 2026
Full-Stack Developer

- Conceived, designed, and implemented the entire product from scratch, from business idea to production-ready web application.
- Built a full-stack e-commerce platform using Next.js, React, Node.js, AWS (Lambda, DynamoDB, S3), and Stripe for payments.
- Implemented personalized product flows, image handling, order management, and deployment on Vercel, witha focus on performance and scalability.

Litera LLC   OCT 2019 – SEPT 2025
Software Developer

- Frontend-focused development of enterprise web applications using CxJS (React-based), with strong emphasis on WCAG accessibility, performance, and maintainable UI architecture.
- Built reusable UI components and complex data-driven interfaces; collaborated closely with backend teams.
- Contributed to backend features using Node.js and AWS Serverless (Lambda, DynamoDB, S3) in an Agile/Scrum environment.

Reference letter upon request
